

The new AIDA Winter Promise for safe and flexible travel

December 9, 2021

Escaping from the winter blues and into the sun - with the 2021/22 winter program, AIDA Cruises is taking its guests to the most beautiful destinations. Sun-seekers can look forward to endless sandy beaches in the Caribbean. It will also be exotic and exciting on the cruises in the Orient, for example with a visit to EXPO Dubai. The Mediterranean and Canary Islands routes promise spring-like temperatures and unique holiday experiences. Winter relaxation can be found on AIDAprima, which also has an ice rink on board. From Hamburg, the ship calls at metropolises in Western Europe on seven-day cruises.

With the new AIDA Winter Promise, AIDA Cruises offers its guests extra flexibility and security for all new bookings from 9 December 2021 with voyages beginning up to and including 31 March 2022. All AIDA tariffs offer the option to change both the travel date and the itinerary once and free of charge up to 40 days before departure.

With the extended AIDA health and safety concept, guests can enjoy their holidays relaxed and safe at the same time. All AIDA cruises take place with an adjusted passenger capacity. In addition to the regulations on vaccination protection and the additional COVID-19 tests before arrival, the comprehensive preventive measures include regular health checks on board and extensive AHA rules. Comprehensive care is provided around the clock in the Medical Centres, which are equipped with the latest COVID-19 testing devices, among other things.

The company has published detailed information on the new AIDA Winter Promise at www.aida.de/winterversprechen.

The AIDA Holiday Compass provides all the important information on travel preparation at a glance, including vaccination, testing and entry requirements, excursions and the health concept: www.aida.de/urlaubskompass.
